## Ventasel

Started a full-time job at Ventasel, a family business targeting ventilation, air filtering, and dust collection systems. As an IT Admin was also responsible for:

- Implementation of a network infrastructure and folder sharing;
- Boost productivity and technologies;
- Optimization of internal processes, documents, and templates;
- Branding and design;
- React js website design and implementation;
- Website/email hosting and administration using cPanel;
- Custom React dashboard management software;

## Wisecare

WiseCare is a healthcare platform developed at codeseam. In addition to being the front-end lead, I was mainly responsible for:

- Client communication;
- Gathering requirements ;
- Branding and application layout design;
- Architectural definition and requirements implementation;
- React components creation;

## Know-how

- React application development;
- Building application interface using Material-UI/Bootstrap;
- Development of a server using Node.js and Express;
- Full-stack development using the MERN stack;
- Manipulating documents in MongoDB ;
- React Front To Back 2019 - Brad Traversy;
- Mern Stack Front To Back - Brad Traversy;
- Node.js API Masterclass With Express & MongoDB - Brad Traversy;
